Israel backend discovery source audit

Checked 2026-10-18 19:13 UTC

9 employer feeds checked; 4 discovery candidates; 0 feed failures. This audit reads public feeds only and does not create applications. Candidates pass geography, role, profile-skill and 30-day publication filters. Full suitability is evaluated later by the scoring workflow.

Greenhouse dates mean first publication. Ashby dates mean last publication and may describe a republished role. Update times are never treated as publication dates. Unknown publication age is explicitly labeled and retained only for records returned by a live employer feed.

Pendo (greenhouse/pendo)

26 live jobs; 0 selected.

At-Bay (greenhouse/atbayjobs)

34 live jobs; 1 selected.

Software Engineer

Tel Aviv-Yafo, Gush Dan, Israel | Publication: 2026-10-01T07:48:13-04:00 | recent
Profile skill evidence: Python, Elasticsearch
